Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 9 -16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Lindsay ('089). See claim 10, column 3, line 66 through column 4, line 30, and column 5, lines 24-41.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 19-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lindsay ('089) in view of Kristal. The primary reference discloses the invention substantially as claimed; see claim 10, column 3, line 66 through column 4, line 30, and column 5, lines 24-41. However claim 10 of the reference does not disclose heat fusing the clear substrates. The primary reference does disclose using any plastic as a substrate and securing the substrates together by any well know means to form the array of bags; see column 4, lines 14-16 and column 3, lines 27-28. Kristal discloses

Art Unit: 1772

heat fusing two sheets together at lines to form an array of gas filled cells; see the Abstract. It would have been obvious to one of ordinary skill in the art to select a heat sealable substrate and adhere the substrates together using heat as taught by the secondary reference in the article of the primary reference in view of the suggestion in the primary reference to use any plastic as the substrate and any well know means of securing the layers together.

Allowable Subject Matter

5. Claims 17, 18, 25 and 26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
